

3 April 2017, Vienna (AT)

Invitation

EMF Standardisation, Compliance and Certification Workshop

Organised by the Mobile & Wireless Forum (MWF)

The transitional period established by the Radio Equipment Directive 2014/53/EU (RED) will end in less than 75 days. New products placed on the European market from 13 June 2017 onwards need to comply with the RED requirements. Open questions remain with regards to the availability of harmonised standards and the implementation of new concepts such as 'reasonably foreseeable conditions of use'.

The Mobile & Wireless Forum invites you to discuss open issues with well-known experts who are actively involved in the final implementation phase of the RED. They will share their knowledge about the latest status of the on-going work focussed on compliance and certification under the RED with a focus on:

- EMF/RF Standards for the Radio Equipment Directive
- How to refine measurement standards to fit RED
- The challenges for harmonised standards
- RED Guide: Latest Developments
- Applicable standards in the UK after Brexit

Confirmed speakers include **Phil Chadwick**, **Matthias Meier** and **Joe Wiart** from **CENELEC** as well as **Michael Sharpe** from **ETSI**.

The workshop is taking place on Monday, 3 April 2017, 9:30–14:00, in Vienna, Austria and is free of charge.

If you would like to attend the workshop please contact:

Michael Milligan
michael.milligan@mwfai.org

or **Sabine Lobnig**
sabine.lobnig@mwfai.org

Places are strictly limited so please register your interest as soon as possible.

Remote participation will also be possible.
